

BECCARIA

LIMITLESS INNOVATION

Beccaria Srl is specialized in the design and production of standalone machines, complete systems, and engineering studies solutions in the plastics and recycling industries. With an extensive experience and a highly technical approach, Beccaria Srl delivers customized solutions tailored to meet the specific needs of each client, combining **technological innovation, reliability, and precision**. The company stands out for its ability to support clients throughout every stage of the project – from initial consulting to installation and final testing – ensuring **efficiency, sustainability, and high-quality production processes**.

1 Vertical **MIXING SILO** mod. **TM/TMX** designed for indoor production, ideal for fast mixing of flakes, granules or regrind

2 Vertical **MIXING SILO** mod. **TM/TMX** designed for indoor production, ideal for fast mixing of flakes, granules or regrind

3 **BIG BAG** Loading System for handling bulk materials

4 **BIG BAG** Unloading System

5 **PNEUMATIC CONVEYING** Lines for long distance transport

6 Storage Silo mod. **SBP** (Bolted Panels) - **SLP** (Monolithic)

7 Storage silo with paddle extractor "**SLF**" designed for low bulk density material

8 Vibrating sieve for screening and particle size separation of materials, ensures material purity

K KONGSKILDE
Air solutions / your success

9 Tubular or U-trough screw conveyors for continuous mechanical transport of granules, regrind, powders or shredded materials

10 Single shaft horizontal batch mixer mod. **MA/1**

11 Engineering studies and production of complete systems to support your washing, graining or extrusion plant
